OBJECTIVE

A dedicated Data Analyst with a strong background in interpreting and analyzing supply chain data to drive operational efficiency and business growth. Proficient in Advanced Excel, SQL, Python, and Power BI, committed to optimizing data quality and accuracy to support data-driven decision-making processes within complex corporate supply chain environments.

EDUCATION

Presidency University 2021 – 2023
Masters in Business Analytics and Finance

JNTU Ananthapur 2015 – 2019
B.tech Computer Science

WORK EXPERIENCE

Genpact Jun 2024 – Present
Business Analyst

- Collaborate on demand forecasting for a US-based electronics client using statistical models including ARIMA and other time series methods.
- Analyze year-over-year sales trends and point-of-sale (POS) data to drive accurate volume planning.
- Share weekly and monthly forecast allocation and performance reports directly with clients, ensuring transparency and actionable insights.
- Develop and maintain automation tools using Excel VBA and Power Query to streamline reporting processes and improve operational efficiency.
- Ensure zero client escalations by maintaining high data accuracy and timely delivery of analytical outputs.
- Work cross-functionally with production and supply chain teams to align forecasts with production planning goals.

Capgemini Apr 2023 – May 2024
Senior Associate

- Spearheaded volume forecasting accuracy improvement of 2.3% through comprehensive analysis of year-to-year sales trends at Unilever.
- Collected and analyzed raw supply chain data to identify trends and patterns for predictive insights.
- Enhanced client ROI by strategically aligning promotional activities with data-driven insights.
- Developed and deployed VBA macros in Power BI to streamline routine operations, resulting in a weekly time saving of 15 hours.
- Conducted successful User Acceptance Testing (UAT) for multiple iterations of Salesforce applications.

EMBIBE Sep 2019 – Jul 2022
Junior Analyst

- Collected and reported raw data to spot trends, patterns, and irregularities for predictive insights.
- Managed and analyzed a books dataset using SQL queries to extract valuable insights and optimize data organization.
- Introduced a new reporting system with Excel power pivot, cutting processing time by 30%.
- Handled rising query tickets and maintained content rail dashboards.
- Created Excel-based visual models to meet project needs effectively.

PROJECTS

- **Forecasting Time Series Dataset (ARIMA)**
- **Data visualization using Tableau**
- **Text mining of marker basket analysis using Python (Pandas, Matplotlib, Wordcloud)**
